

## Price list Great Britain

Prices may vary depending on the operator of the charging station. Please check the valid prices in the CHARGE NOW app before you start charging.

CHARGE NOW differentiates the following charging speeds:

AC charging capacity of the charging station up to a max. of 22 kW

(AC – alternating current)

DC charging capacity of the charging station up to a max. of 100 kW

capacity(DC – direct current)

HPC charging capacity of the charging station from 100 kW

capacity(HPC – high-power charging)

Charging stations, which are provided free of charge by a charge point operator, are also generally provided free of charge to CHARGE NOW customers. You can conveniently filter for free charging stations on our map. Please note that the transaction units for charging in public areas may vary due to regulatory requirements in the individual European countries. A transaction is differentiated in terms of kWh, time (min.), or by charging event (session). All prices are individually based on charge point operators. A variable tariff applies with regard to the individual charging session. The prices depend on respective charge point operators. Please inform yourself about the valid prices in the CHARGE NOW app before you start charging. For charging abroad (e-roaming), you will always pay the local sales rate without any additional fees.

## CHARGE NOW

The rates that apply to an individual charging event at the respective charging station can be found in the CHARGE NOW app and are subject to change. Please familiarise yourself with the applicable rates before commencing the charging event.

### Tariff: Urban

#### Domestic charging fees

All prices include VAT

1) The contract has an indefinite term and can be terminated by either party by giving one month's notice starting from the end of the current month.

## **Charging Event Transaction**

The invoicing of varying fees for charging is based on the appropriate tariff per minute (per commenced minute), per kWh or per charging event. The charging event starts if the vehicle is connected to the charging station and ends when it is disconnected. You can also recharge for free using the CHARGE NOW service at free charging stations.

2021-11-01, all rates incl. VAT, subject to changes and errors.
